FY2011 GreenBuy Award Recipients

HSS
Office of Health, Safety and Security

The **GreenBuy Award Program** recognizes DOE sites that successfully purchase products with leadership-level sustainability attributes—purchases that save energy, conserve water, and reduce health and environmental impacts. The Program incentivizes DOE sites to purchase products whose performance goes "beyond compliance." Through the GreenBuy Program, DOE sites are integrating sustainable approaches and materials into the way they carry out their missions.

Benefits of the GreenBuy Awards

- Reduced health and environmental impacts
- Energy and water savings
- Reduced life-cycle costs (savings from lower resource consumption, waste disposal, and permitting costs)
- Supports LEED (Leadership in Energy and Environmental Design) and Federal sustainable building requirements

For more information about the GreenBuy Awards, contact the Office of Sustainability Support at (202) 568-4598.
